

DELTA

THE BUSINESS PHONE

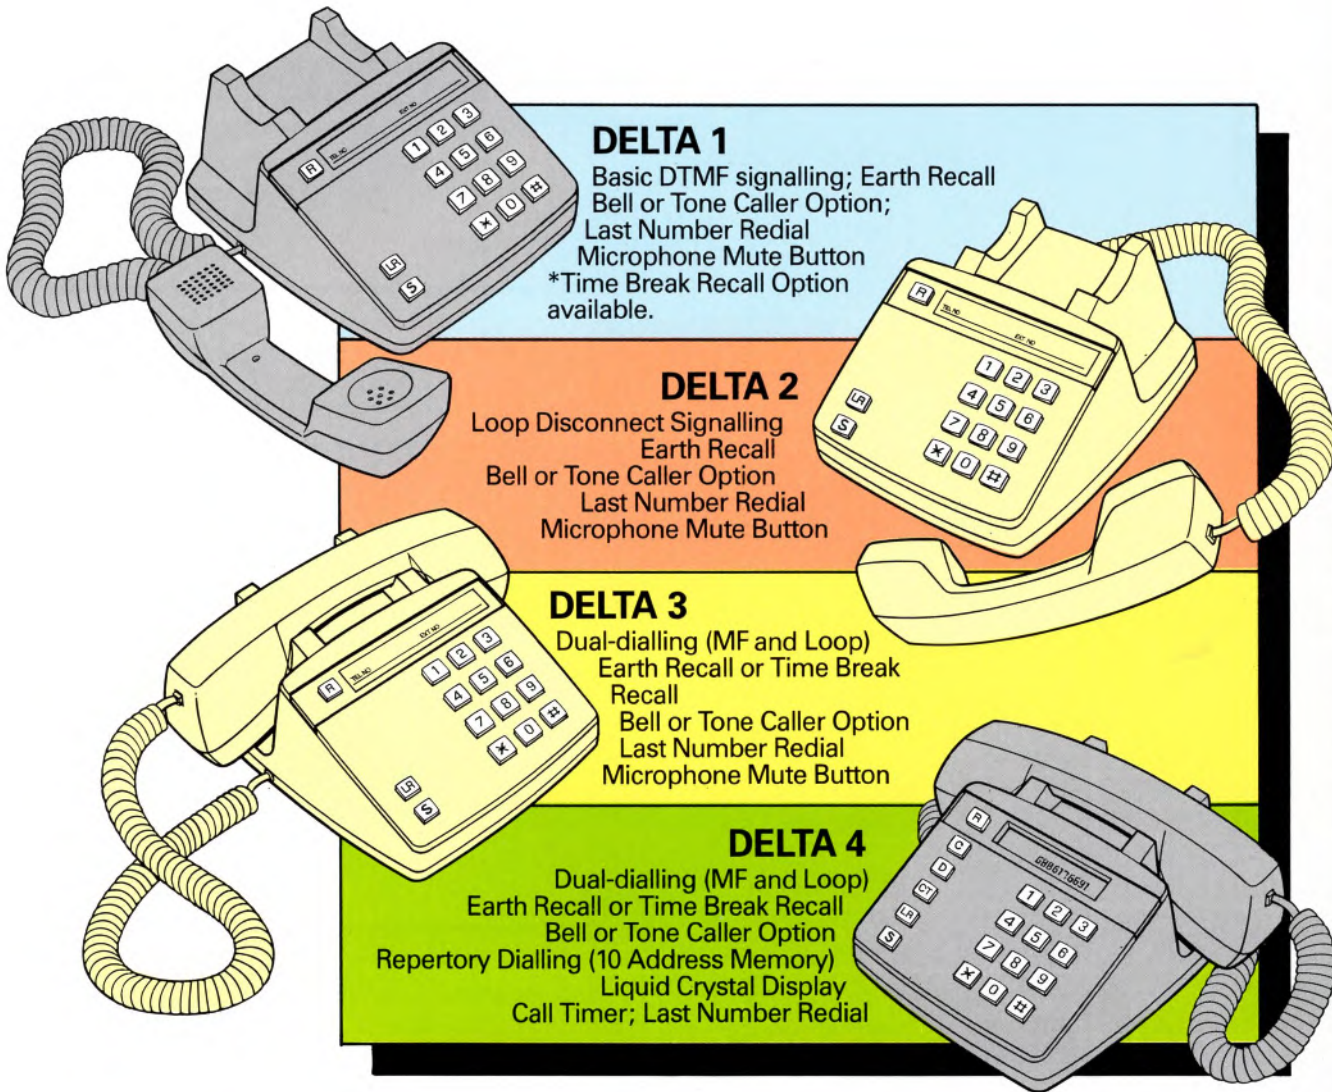

AUTOPHON
THE MESSAGE IS CLEAR

At last, a business telephone developed with the needs of the PABX user in mind. The DELTA range is a multi-purpose electronic telephone designed for most types of telephone switching systems. Just look at the array of benefits offered by this new low-profile instrument;

- ☞ It looks like a telephone – incorporating the conventional east-west handset styling.
- ☞ It has a weighted base – to remain immobile on the desk.
- ☞ It offers a choice of adjustable bell or tone-caller – important in open plan offices.
- ☞ Can be connected to most types of PBX systems – using earth recall or time-break recall.
- ☞ Contains a volume control – to adjust the volume of the bell or tone-caller to the strength preferred.
- ☞ Features a carrying recess for mobility.
- ☞ Can be supplied with varying cord lengths to suit specific needs.
- ☞ Offers a dual-dialling capability. From the keypad, either loop disconnect signalling or DTMF signalling can be selected.
- ☞ Provides a range of 4 models to meet a variety of requirements.
- ☞ Option of message waiting lamp.

COLOURS: Choice of colours – Beige and Light-Grey
