MONEYBOX FROM INPHONE.TM

THE PAYPHONE THAT SAVES YOUR CUSTOMERS GOING LONG DISTANCE.

Moneybox is a new payphone from British Telecom that answers the need for a compact, countertop payphone for use by customers in supervised situations.

It saves them having to ask to use your private phone.

It saves you having to say no.

If you already have a conventional payphone, it saves space (and money – Moneybox has the lowest rental charge of all payphones).

If you haven't, it saves customers taking a walk to the nearest public phone box.

In other words, Moneybox is a welcome extension to your service that'll really get everyone talking.

IN THE LOUNGE BAR. OR IN THE LOUNGE.

Where can Moneybox be used?

Small businesses in the service sector readily spring to mind – pubs, restaurants, guest houses, garages.

Less obvious but just as useful, a Moneybox in the home.

Then teenagers, home helps or lodgers can make calls and also make contributions to the cost.

If you want to make a call without inserting any money, you simply use the special key provided to convert Moneybox into a normal Inphone.

OPEN THE BOX. TAKE THE MONEY.

Moneybox can be programmed to accommodate the differing tariff structures that exist for units of time spent on the phone.

Then it's simplicity itself for a customer to use the phone. A series of 'user prompts' on the digital display tell him when to insert the coin and how much time he has left in which to talk.

It's also easy for you to empty Moneybox when it has accepted the maximum of 100 ten

pence pieces. (You'll know when it's full because the digital display tells you).

You can use the cash as till float or put it aside until the quarterly phone bill arrives.

OUT OF SIGHT. OUT OF MIND.

To deter the opportunist thief, you can put Moneybox under the counter when not in use. For a more permanent fixing, it can be screwed to a level surface.

Moneybox also has a number of features designed to prevent fraud or coins jamming in the slot. And no-one but you will have a key to get at the cash.

Extend your service with Moneybox, the compact, convenient and affordable payphone from British Telecom.

For more information on the Moneybox, contact your local Telephone Sales Office

Moneybox is a completely self-contained payphone that simply plugs into a new style Inphone socket. If your home or office is not yet fitted with these sockets, they can be fitted by British Telecom almost anywhere you want – quickly and at a reasonable cost.

Moneybox is engineered to the highest standards and is fully tested and approved for connection to the British Telecom network.

We do our best to supply our customers with the apparatus they ask for, but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this leaflet.

Moneybox and Inphone are Trade Marks of British Telecom.
