

EXTENSION PLAN 8A

AUTOMATIC SYSTEM - INTERNAL ONLY

NOTES :-

Extension Plan 8A consists of two exchange lines and one internal Extension with secrecy

This plan is designed to avoid the fitting of small switchboards and is not provided in connection with a Private Branch Exchange

FACILITIES :-

A two position switch enables the user at the Extension to connect his telephone to either exchange line, at the same time disconnecting the associated Main telephones

The indicators on the unit show when the exchange lines are in use by the Main telephones

Incoming calls are received normally at the Main telephones. The Mains can call the Extension by press-button, operating a trembler bell or buzzer to distinguish between the two lines. The Mains are secret against the Extension and each other, and the Extension is secret against both Mains

Intercommunication between telephones is not provided
