NOTES:- (a) Specification D 1000 shall be taken as forming part of this Specification.

(b) The first issue of this Specification carries a number without a suffix letter. When the Specification is re-issued a suffix letter is added and for each subsequent issue the suffix letter is advanced by one.

(c) Except when a specification is completely re-written an amended paragraph is indicated by a star adjacent to the paragraph number and the particular portion amended is indicated by a vertical line in the margin.

1. GENERAL ASSEMBLY DETAILS.

The apparatus shall be assembled on a plug-in relay-set base.

General Specification referring:- T 5301

General Drawing referring:- TP 603

PABX No. 3 Specification referring:- S 365

Layout of Apparatus:-

*A	R1/R2
CD	B
I	H

Mounting RS2/3000/8 (Drawing TP 204 Sheet 1 Fig. 1 refers)

*To be fitted with Part No. 1/SSH/1 to drawing SSH/1

2. WIRING

The relay-set shall be wired in accordance with Specification T 5241 and shall be wired with Wire P.V.C. No. 3 /6 $\frac{1}{2}$ lbs. to Specification CW 109.

3. CODE MARKING

The code marking shall be in accordance with Specification T 5301.

Rota 16473/S

4. LABELLING AND ENGRAVING

Labels No. 236, 237 and 238 shall be engraved in accordance with Specification S 365 when the equipment is installed.
