MITEL

SMarT-1™ *Compact*

Mitel has developed this innovative access solution specifically for home and small office use. It is completely self-installable, and fits through a standard letterbox. So you can get customers onto your network without delay. The SMarT-1™ Compact also features a Call Home feature, which allows simple remote management, and its neat design is ideal for SOHO environments.

Small in size, big on benefits

- The first dialer on the market capable of handling extra household extensions.
- Self-installable - unwrap and just plug in.
- Can fit through a standard letterbox - for ease of delivery.
- Call Home feature allows simple remote management and maintenance.
- Compatible for national code changes and ongoing management.
- Lower initial investment allows you to target more lower call spend customers.
- Line powered - so no need for power supply in most applications.
- Manage customer base reprogramming with the easy to use web-based dialer Management system SMarT-1™ Central.
