# **SMarT-1™** *EuroRoute 4 Line Dialer*

The SMarT-1™ EuroRoute 4 Line Dialer is perfect for SME customers with either a single or two stage call set up operation. It's highly compatible with all major makes and models of PBX, so the engineer can install it simply and quickly. The light grey, unobtrusive unit will look smart and professional in your customers' reception area. EuroRoute 4 Line Dialer is the first CTR-21 approved dialer available in the market today, and has some innovative new features built in, including the Call Home function.

## **Benefits at a glance**

- Target SME's with lucrative international voice traffic.
- Call Home enables you to detect inactivity, and therefore potential zero-billing.
- Manage customer base reprogramming with the easy to use web-based dialer Management system SMarT-1™ Central.
- Improves customer loyalty - our research shows 80% of your customers forget to dial your network prefix.
- Immediate access to broadcast fax and callback services.
- The drop and reseat function on calling loop lines ensures your customer has guaranteed service, even if your network is unavailable.
- Lower investment levels mean quick payback.
- Can be reprogrammed for re-use on a new customer site.
