

SOPHO

SOPHO BaseLine Pro Business Telephone

- Attractive SOPHO styling
- Pleasant to use
- Clock & timer
- Called Number display
- Message Waiting Lamp
- Hold key
- 20 Memories
- 10 Direct memories
- Ringer LED
- Adjustable ringing tone
- Adjustable ringing volume
- Mute
- Hands-free mode
- Adjustable speaker volume

The SOPHO BaseLine analogue telephone is designed for the business user. The set is heavier and slightly larger than a regular consumer set. The design, colour scheme and branding are completely in line with the SOPHO ErgoLine sets.

We have used our experience to optimise the Baseline for our customers' environment and our switch (see page 2).

Complementary to the extensive features that may be expected from luxury analogue telephone sets, the BaseLine Pro offers PABX specific functionality.

SOPHO telephones support the transfer facilities of our switch. The BaseLine has a special yellow Hold key for this.

A Message Waiting Lamp facilitates the use of Voicemail.

The adjustable ringing tone allows easier identification of the set amongst others in a busy office environment.

The SOPHO BaseLine is equipped with a 2-wire a/b interface suitable for connection to the SOPHO iS3000 Series of ISPBXs.

PHILIPS

Let's make things better.

User benefits

- The use of voicemail is efficiently supported by the message-waiting lamp.
- The length of a telephone call can be displayed by activating the Timer key.
- With the yellow Hold key the transfer facilities of the switch can be accessed.
- 10 direct memories plus 10 memories in the phonebook for storing often-used-numbers.
- With the Check key stored numbers can be verified.
- Last Number Redial facilitates quick redialling on busy tone or someone you just talked to.
- The Save key allows you to temporary store a number (e.g. during a call).
- Ringing tone selection makes it possible to distinguish ringing phones in one room.
- Mute enables you to consult a colleague, without the caller overhearing.
